Module Purpose

The module Lookbook from Business Tech allows you to create product assortments.

For example, in the case of fashion, you can create an assortment of various items that make up a look of a person (hat, shirt, jacket, pants, shoes, and accessories)

The Lookbook module will allow you to :

- Create categories of lookbooks (example: women clothing)
- Create lookbooks (Example: sixties)
- Assign lookbooks to one or many categories.
- Assign products to one or many lookbook.

Technical description

Version : 2.1.3

Latest update : November 28th, 2013

Development : Business Tech – modules@businesstech.fr

Server requirements

Prestashop : version 1.4+

Module installation

IMPORTANT AND MANDATORY PRE-REQUISITES.

For PrestaShop < 1.5

If URL rewriting is activated, you must go in the back-office of your store, click on the «Tools» tab and then on «Generators»

In the textarea, copy and past the following line :

```
RewriteRule ^[a-z]+/lookbook/([a-z-]+)/?([a-z-]+)?$ /modules/lookbook/show-lookbook.php?category=$1&lookbook=$2 [QSA,L]
```

and then click on «Generate .htaccess file»

For PrestaShop > 1.5 until PrestaShop 1.5.4. (no more necessary after v1.5.4)

Edit .htaccess file on your web root and add this line manually just after RewriteEngine On. To install the module you must copy the module folder directly in the folder "modules" of your PrestaShop Shop software by transferring it by FTP.

Refer to PrestaShop FAQ, topic FTP transfer:

 <http://addons.prestashop.com/en/content/21-howto>

Once your module is transferred, check permissions. Your shop should be able to write recursively in the folder "uploads" of the lookbook module. These permissions must be set to

777,
exe-
one.

tion

The screenshot shows two configuration boxes for the Lookbook module. The first box is titled "Lookbook banner image file dimensions" and contains the text "Please change the dimensions of the banner here." Below this is a text input field labeled "Enter the banner size" with the value "555" and the text "pixels. (Default:555 pixels)". There is a "Save" button below the input field. The second box is titled "Lookbook thumbnail image file dimensions" and contains the text "Please change the dimensions of the thumbnails here." Below this is a text input field labeled "Enter the thumbnail size" with the value "120" and the text "pixels. (Default:120 pixels)". There is a "Save" button below the input field.

itself.

 Click
the

-  "modules" back office tab.
-  Unfold the "Front Office features."
-  In this list, you will find the module "Block Lookbook"
-  Click "Install" on the right.

Congratulations! Your Lookbook module is now installed.

For further assistance on installing PrestaShop modules, thank you for visiting the online help at the following address:

 <http://addons.prestashop.com/fr/content/21-howto>

Lookbook module configuration

Module configuration is quite simple.
You only have to configure two parameters.

-  The size of the banners.
-  The size of the thumbnail.

By default, these values are set respectively to 555 pixels and 120 pixels.

Set the desired values to match the theme customization of your shop and click "Save".

Add a category

Lookbook creation and product assignment

Your module is now configured.

Now you need to add new categories and new lookbooks in these categories.

When you installed the module, a new section is added automatically to the tab "catalog" of your shop.

- 💡 Click on the "Catalog" tab of your shop.
- 💡 Then click on the "lookbook" item on the right below the tab bar.

List of the categories			
Name	Description summary	# lookbooks	Actions
My category (mandatory)	Description of my category (optionnal)	0	  

1

Lookbook categories creation

Fig. 1

- 💡 In the field "Category Name" (Fig.1-1), enter the name of your class (all alphanumeric characters are allowed, including accented characters and dashes.)
- 💡 In the field "Category description" (Fig.1-2), enter the category description. (IMPORTANT: This field is mandatory but is not yet used by the module.)
- 💡 The checkbox "Active" (Fig.1-3) is used to select whether the category is active or not. If it is not active, it will not appear in the front office and will not be usable in the back office as long as it remains inactive.)
- 💡 Click on the flag (Fig.1-4) to choose the next language and enter the translated values.
- 💡 Finally click on "save" (Fig.1-5) to save your category.

Fig. 2

In the list of categories, is now the new category you created. The equity portion (Fig.2-1) includes three buttons. Their actions are respectively:

- 💡 [Des]activate the category.
- 💡 Edit the category.
- 💡 Delete category. (Note this step is irreversible and does not expect any confirmation.)

On the line, is also the notion of "# lookbooks." This index indicates the number of lookbooks that are assigned to this category.

Next: Add a lookbook.Lookbooks creation

Assign multiple lookbooks to a category

Update 5

List of the lookbooks

Name	Description summary	# products	Actions
My lookbook (mandatory)	My lookbook (mandatory)	0	✓ ✎ 🗑

Choose the tab "lookbooks" module.

Fig. 3

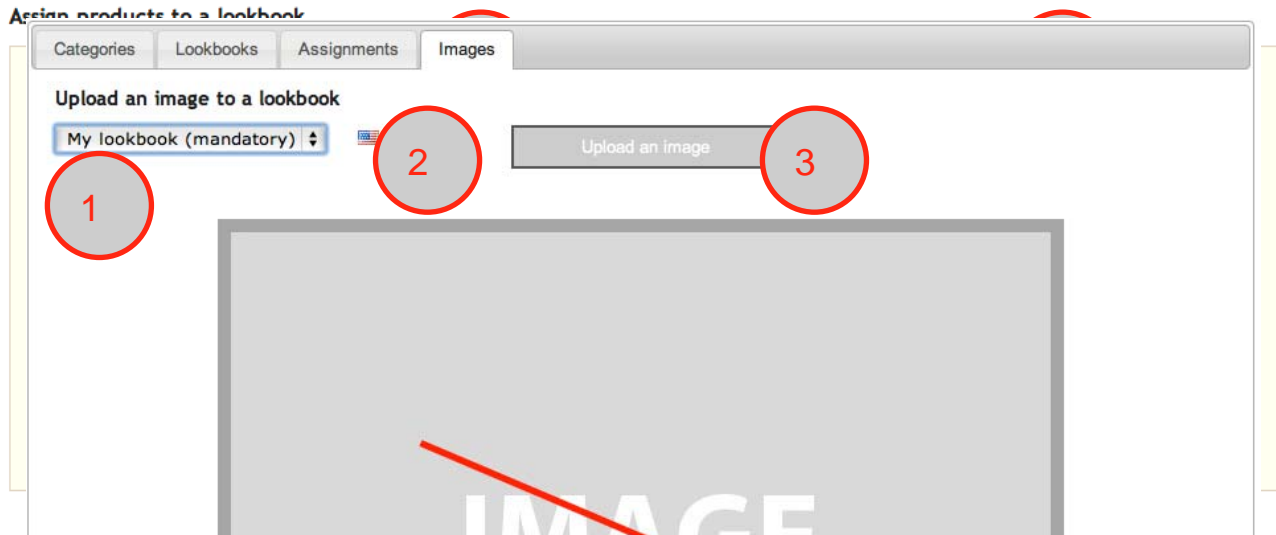

- In the fields "Name lookbook" (Fig.3-1), enter the name of your Lookbook (all alphanumeric characters are allowed, including accented characters and dashes.)
- In the fields "Description lookbook" (Fig.3-2), enter the description of the Lookbook.
- The box "Active" (Fig.3-3) is used to select whether the Lookbook is active or not. If not active, it will not appear in the front office and will not be usable in the back office as long as it remains inactive.)
- Click on the flag (Fig.3-4) to choose the next language and enter the translated values.
- Finally click on "save" (Fig.3-five) to save your Lookbook.

Product and lookbook assignment

Lookbook assignment to one or many categories

Fig. 4

- From the dropdown menu (Figure 4-1), select the desired category.

- In the right panel (Fig. 4-2), select the lookbooks you want to assign to the selected category. You can make multiple selections by hitting the command key on Mac or the Control key on PC.
- Finally press the "Add" button (Fig. 4-3), to validate the addition of lookbooks to the selected category.
- Repeat for all categories.

N.B. : You can remove a lookbook from a category. To do so, select one or many lookbooks from the left panel and click the "Remove" (Fig. 4-4) button.

Product assignment to one or many lookbooks

Fig. 5

- From the dropdown menu (Figure 5-1), select the desired lookbook.
- From the dropdown menu (Figure 5-2), select the desired supplier.
- From the right panel (Fig. 5-3), select the products you want to assign to the selected lookbook. You can make multiple selections by hitting the command key on Mac or the Control key on PC.
- Finally press the "Add" button (Fig. 5-4), to validate the addition of selected products to the selected lookbook.
- Repeat for all the lookbooks.

N.B. : You can remove one or more products from a lookbook. To do so, select one or many products from the left panel and click the "Remove" (Fig. 5-5) button.

Next: add an image to a lookbook.

Add images to lookbooks

This part is very simple.

Fig. 6

-  Choose a lookbook from the dropdown menu (Figure 6-1).
-  Choose the language from the dropdown menu (Figure 6-2).
-  Choose a file to your computer and drag in on the gray box (Fig. 6-3).

N.B. : Instead of dragging a file directly to the shape, you can click it and choose a file directly from the classic exploration menu of your operating system.

N.B. : It is not possible to delete an image once it has been added. It is assumed that a lookbook will always show an image which represents it. By cons, we can replace an image by an other.

IMPORTANT : Only JPG (.jpg extension) files are accepted.
